I hereby assume responsibility and any liability for any se of the electricity in the building during this temporary period. I understand that the extension of this temporary approval must be applied for if the work is not completed at the expiration date; otherwise I understand that you will direct the utility company to disconnect the service. It is further understood that no occupancy is allowed during the use of this temporary approval and that occupancy will result in a disconnection of the electrical service. I or we relieve the City of South Fulton Government and its inspection staff from any liability for damages, or loss of property, for ordering the electricity to be disconnected from the wiring system. Temporary power may and will be revoked if abused or life safety issues become apparent. The following must be completed:

1. Structure must be weather tight and secured for access at all openings.
2. All drywall must be hung.
3. National Electrical Code (NEC) compliant service equipment, distribution panel and devices; minimally a single GFCI branch circuit protected outlet, and all other breakers in with cover installed. GFCI must be located in the garage and that circuit identified on the panel schedule.
4. Service is ready for connection to public utilities.
